

Great Lakes Clean Communities Network

• Connect To Protect •

About the Network

Big change is possible when people work together, generate new ideas, and forge partnerships. That's the goal of the Great Lakes Clean Communities Network (GLCCN), developed with support from the Great Lakes Protection Fund. **The GLCCN is a free online network for environmental professionals working in the Great Lakes Basin.** The Network is a place for practitioners to build new and stronger partnerships, translate innovative ideas into powerful outcomes, and discover game-changing tools and resources. The GLCCN seeks to build synergy and find better solutions for the Great Lakes.

Join the Network

Connect

Connect with others in the network

Share

Share tools, resources, events and successes

Tools

Find innovative tools and resources

EcoScore

Calculate and track ecological health

Network Benefits

- Connect with individuals working toward the same environmental goals
- Add yourself and organization to the GLCCN Great Lakes Map
- Easily and quickly locate potential partners or resources for your projects
- Promote your presence as a leader by sharing your work and success stories
- Access a myriad of innovative online environmental tools and resources
- Learn effective strategies for using social media for public engagement
- Receive funding for green infrastructure practices through GLCCN mini-grants
- Use a proven framework to evaluate your community's ecological health and track progress
